What is Chitosan!

(active ingredient of Bac-Shield)

“Chitosan is used primarily as a plant growth enhancer, and as a substance that boosts the ability of plants to defend against fungal infections. It is approved for use outdoors and indoors on many plants grown commercially and by consumers. The active ingredient is found in the shells of crustaceans, such as lobsters, crabs, and shrimp, and in certain other organisms. Given its low potential for toxicity and its abundance in the natural environment, chitosan is not expected to harm people, pets, wildlife, or the environment when used according to label directions.”

<http://www.WIKIPEDIA.org>

Bac-Shield™ is the anti-microbial product of Chem-Tex Laboratories. Bac-Shield protects treated articles against bacterial growth, fungal growth, mold and mildew.

Ordinary cleaners and disinfectants offer

no protection to materials after treatment, leaving them vulnerable to recontamination. As well, these treatments are often toxic to humans and bad for the environment. Bac-Shield “fills the gap” between cleanings by inhibiting the growth of bacteria, mold, mildew, and fungi that cause odor, stains, discoloration, decay and deterioration of the treated materials. Bac-Shield’s active ingredient is chitosan, a derivative of formerly

wasted snow crab shells, an abundant and replenishable natural resource with a long history of safe and effective application. Chitosan is biodegradable and classified as Category III on the EPA’s toxicity scale. ([PDF of MSDS](#))

PROFESSIONAL MEMBERSHIP IS NOW AVAILABLE!

- *NORMIPro.com eMail Service*
- *DOMAIN Name (ONE FREE!)*
- *Expanded Website Pages*
- *FREE Picture Gallery Wizard*
- *OSCAR on your NORMIPro Site*
- *NORMIPro Phone Extension*
- *LIVE ONLINE Help Banner*
- *ProLocator Higher Ranking*
- *PRIVATE Talking Studio Usage*
- *FREE Refresher Course (1)*
- *ProLocator Additional Listings*

Just a few dollars a month sets your business apart from the rest and gives you the professional look you are after and your clients expect.

Bac-Shield is registered under the Treated Article Exemption with the EPA and is hypoallergenic - it will not trigger shellfish allergies. Articles treated with Bac-Shield have passed industry standard tests: AATCC-100, 147 and 174.

RECOMMENDED USES

for Harsh Environment Applications:
