CE TUESDAY NIGHT—LIVE in the NORMI Talking Studio...616.712.8000 x 988162#
7-9pmEST "How Have You Progressed on Your Goals for 2009?"—The NORMI Team

* Dr. Rapp and Doug Hoffman answer questions from the members in the CE Training on Tuesday Night. This was so popular that it has been replayed several times for those who were unable to attend. Dr. Rapp dealt with a variety of environmental and related health issues.

* Linda Eicher and Dr. Rapp discussed in detail the 30 Tips to Healthy Living that included different areas of the home, different products you use, and even things as "obscure" as the type of cooking utensils you have in your kitchen. This was very enlightening.

* In a "sit-down" interview, Dr. Rapp was able to talk about how she believes NORMI and her foundation have a great opportunity to work together to solve many of the issues people deal with everyday. She deals with their health, and NORMI, the environment.

Mrs. Debbie Waldron suffered the devastating, total loss of her home in Lakeview as a result of the 17th Street Canal break. A long-time advocate of "sustainable building", Debbie chose NORMI's Healthier Home Certification program to construct an environmentally green, sustainable, and durable home where her energy savings would be great and her lifestyle significantly improved. She utilizes the NORMI Sanitization Protocol incorporating healthier air purification, surface protection and lifestyle changes to improve living indoors.

"A NORMI™ Certified Healthier Home is a great way to start a new life for me and my family!"

Mrs. Waldron

Mr. and Mrs. Waldron's home is a testimony to the fact that you don't have to have a TON of money to accomplish great things and live healthier. This home cost approximately 2% more to build than conventional construction but affords the latest in NORMI building science concepts to live better.
