### DOUG HOFFMAN AND PAMELIA ARNOLD IN LOS ANGELES

NORMI announced today that Doug Hoffman and Pamela Arnold have been invited to speak at the upcoming 36<sup>th</sup> Annual Cancer Convention 2008, organized by the Cancer Control Society Education Program in Universal City, CA, being held 08/30-09/01. A booth will be provided for the authors to sign copies of their books and talk with Doctors and other participants about the health issues surrounding mold contamination in indoor environments.

Pamela Arnold, author of "Enemy Within The Walls" will also be speaking and signing copies of her book. Mrs. Arnold, who suffered ill-effects from a mold-contaminated indoor air environment, wrote her book to help the public understand the serious nature of such problems and become a resource herself for those who are concerned about indoor air environments. "Pamela has become a very important partner to us," commented Mr. Hoffman, "and we are thankful that she was able to arrange this great opportunity to work together. It is our hope that this will only be the first of many opportunities to work this way domestically and internationally."

Doug Hoffman, Executive Director of NORMI, the National Organization of Remediators and Mold Inspectors, and author of the book "Mold-Free Construction" formed the organization on July 4, 2004 to be a certifying agency for mold professionals who desire training that would lead to state licensing. "I am thrilled by this opportunity to talk about NORMI, my book, and mold issues in general and believe we will have the ability to explain the importance of our solution-based indoor air quality trainings to lots of people," remarked Mr. Hoffman. "We anticipate a very large crowd of professionals who are eager to learn what we already know and are learning about mold and its deleterious effects on the health of their patients."

The convention, held at the Sheraton Universal in Universal City, CA across from Universal Studios Hollywood, is designed to allow attendees to learn about the prevention and control of cancer and other diseases through nutrition, tests and non-toxic therapies such as laetrile, gerson, hoxsey, poly-mva, enzymes, phytochemicals and immunotherapy from medical doctors, clinical researchers, nutritionists, and authors. In addition, discussions will be offered on chelation, DMSO, oxygen, herbal, cellular and electro-magnetic therapies.
