- 30) There will be lots of information,
- 31) You can get your questions answered,
- 32) There will be new things to learn about,
- 33) The price is going up,

A NOTE from the TOP regarding Reason #11

NORMI's credibility has a powerful impact when we are viewed by other organizations, legislators, and manufacturers. Your credibility depends on ours and we are working hard every day to meet the challenge. It's now time to require something of you—something that is standard throughout the organizations with whom we work and standard throughout the states for which we provide education. A re-certification process is coming! We need to meet that standard!!

By February 2009, NORMI will have in place a re-certification process that will allow you to retain your certifications for a set period of time. We are in the beginning stages of developing this program but the important thing for you to know is that for those who come to the Training Conference in January, you will be able to earn enough re-certification credits to extend your status through the next certification period. There will be other ways, too, of course, but that will be a "no-brainer", as they say.

You have probably noticed in the NORMIPro Locator that we have now listed the date you took your first class and the expiration date of your certification(s), February 2009. Everyone will renew their certification(s) by that time. As the trained individual, your certifications will renew together. We will roll this out in an incremental way so those of you who are ACTIVE will find it especially easy to meet. ACTIVE Membership WILL be a part of the package.

We want to be the best we can be for YOU. We believe you are ready to join us in this challenge that is **required** by every other credible trainer or trade organization! D
