CE	TUESDAY NIGHT—LIVE in the NORMI Talking Studio...616.712.8000 x 988162#
7pmEST	Moisture Problems and Relative Humidity—come join us!
9pmEST	activTek Environmental National Conference Call 712.432.7616 x 69246#

TOOL of the Trade (Extech 3 in 1)

This dynamic product does exactly what you need it to do when you're doing an IAQ or mold inspection and/or trying to evaluate how to determine what air purification technology to use in a commercial establishment. You can purchase this product online at www.professionalequipment.com and be prepared to do the following with this powerful tool:

- 1) Simultaneously displays Temperature and Air Velocity or Relative Humidity
- 2) Min/Max, Data hold, Auto power off with disable feature.
- 3) Built-in low friction vane wheel improves air velocity accuracy.
- 4) Thin-film capacitance humidity sensor for fast response.
- 5) Ergonomic pocket size housing, large dual LCD for easy reading.

How would you use this tool? When you first arrive at the location, take a RH and Temperature reading and record your readings. Then, as you move from room to room taking your air or surface samples, take a reading in each location. The readings are quick and you can use the "hold" button, if you like, until you have a chance to record your readings. You will be amazed at the difference in each room and may be able to spot problem areas where IAQ problems could be worse.

In the commercial environment, air flow, both direction and velocity, is EXTREMELY important to the effective operation of pro-active technologies. As you increase the airflow above a certain velocity, the air purification technology actually becomes less effective. If there is too much velocity, the catalytic reaction may stop working altogether. In some cases tilting the probe to 30° angle can make a significant difference in the technology's effectiveness and the improvement substantial.

Use this tool whenever you do an inspection and you'll be amazed at how much more information you can provide your client. ca. \$150

BUILDING SCIENCE CLASSES

NOW LIVE ONLINE

Each class will be presented twice at 9amEST and 7pmEST

NORMI LIVE Talking Studio

using a password supplied once you register for the class.

Handouts will be emailed to you so you can print them out in time to take notes at the class!

\$25 per class

09/03 Insulating the Envelope

09/17 Non-Vented Attics

09/24 IAQ Basics 101

10/08 Anti-Microbials on Substrates

10/15 FOUR Bundled in Philly!

877-751-3100

Virtual Chapter

Lance Eisen, ext. 81010
