NORMI™ Partners w/activeTek Environmental To Promote Upcoming CMI Class

The Schedule

◆ PRESS RELEASE PROMO—

The National Organization of Remediators and Mold Inspectors (NORMI), has scheduled a Certified Mold Inspector class in Greeneville, TN, on Thursday, November 1st. The 8-hour class is designed to train the business owner on mold as an indoor air quality problem, how to screen for it, and how to develop an IAQ Profile for the purpose of offering IAQ solutions to combat mold problems.

This comprehensive training is structured around NORMI's 7-Step Business Model that includes a step-by-step process that takes the business through the important areas of advertising/marketing, contracting, IAQ/Mold Risk Assessment, writing an IAQ/Mold Report, and implementing the Sanitization Protocol.

Doug Hoffman, Executive Director of NORMI and an EcoQuest Coordinating Sales Manager will also provide, for those who wish to stay after the class, an opportunity for overtime students to review and dissect an actual Case Study that utilized the 7-Step Business Model and resulted in a \$15,000 sale of activTek Environmental products.

Seating is limited so register TODAY at www.BestTrainingSchool.com with your deposit of \$49. The special EcoQuest Savings Voucher of \$50 will allow you to pay a net cost for this class of \$129, otherwise the total SPECIAL PRICE for this class is \$179. Pay the deposit today and bring your voucher to the class.

Seating is limited.
