**A NEW Certification is HERE!**

The NORMI Certified Indoor Air Quality Specialist is the FIRST IAQ certification that supports advanced indoor air quality training. Based on the 1-Day activTek training, this certification carries the full force of all NORMI Certifications and provides the professional with an opportunity to leverage his./her training as an IAQ solutions provider.

How do you qualify for the CIS? This is the “great news” part...You have options:

1) If you have already been trained in the 1-Day activTek Training but you HAVEN'T activated your NORMI Membership, NORMI is providing, through the end of the year, a ONE-STEP process where you can activate your membership for just \$9.95 a month (Bronze) AND receive your CIS parchment certificate for just \$25.00 by going to

[www.cis.normi.org](http://www.cis.normi.org) There you will be guided through the process and, once verified, you will receive your certificate. Of course this also allows you access to the NORMI Talking Studio where EVERY WEEK you can receive TWO HOURS of live training...it just doesn't get any better than this!

2) If you have already been trained in the 1-Day activTek Training and you ALREADY ARE an Active Member, simply go to the member section at [www.normi.org](http://www.normi.org) and find the CIS certification request. By paying the \$25.00 certification

fee you will receive the parchment certificate and have your credentials updated at the NORMI-Pro.com website.

3) If you HAVE NOT been to a 1-Day activTek training then you can come to the Orlando event (see calendar on left) and take the course. You will then automatically become qualified to get certified by clicking

on the certification request in the member section...that easy.

So, this is an opportunity for you to add more credentials to YOUR existing credentials and get more credibility in the IAQ arena. Don't delay...DO IT TODAY!!

**Training Matters**

<input checked="" type="checkbox"/>	<a href="http://www.BestTrainingSchool.com">www.BestTrainingSchool.com</a>
