October 2009	Philadelphia, PA CMR, AAA, PSP
	<i>Remainder of 2008</i>
12/05	Manchester, NH PSP Course

Regional Training Seminars

The concept behind the upcoming Regional Training Seminars is unique. Only NORMI offers enough different types of trainings to make such a concept reality. What are the advantages to you?

1) The Regional Training Seminar gives you the opportunity to **save money** because several events/trainings are include in one central location instead of being spread out across the US. Many NORMI Members find that additional certifications add credibility to their business but getting those additional certifications can be costly if you have to wait for NORMI to come back into your area or close to you. By offering multiple certifications at one locations, you can choose the ones you want to complete your training.

2) The concept of having several events/trainings in a **metropolitan area** makes it less expensive to fly into and out of that location. Trainings that take place in a small city can be expensive

and hotel venues are limited. Larger cities typically offer multiple options so the venue is easier to get to and often provides airport transportation and parking at no additional cost. We have listened to those of you who travel some distance to get to our classes and this will make it easier for you to travel to and from the event.

3) When you have several certifications in one place you also get **several trainers** in one place. This additional expertise and networking opportunity can only be available when the multiple classes justify the added expense of having more than one trainer on location. The benefit to the member is obvious—more expertise means more learning!

In 2009, this concept will become the norm. We are changing the way people are trained making it easier and more affordable. Support our efforts and take advantage of these Regional Training Seminars. You AND your customers will benefit!

NEW TRAININGS COMING...

<input checked="" type="checkbox"/>	<i>ONLINE COURSES</i>
