The HOBO Data Logger

This an invaluable diagnostic tool and becomes the basis for the NORMI Healthier Home Warranty. The professional programs this device to record the Relative Humidity and Temperature over a set period of time (ex. every hour for one year) and then, using the U-Shuttle, download the information through a USB port. A graph can then be printed that is forwarded to NORMI for evaluation. This tool can also be used as a diagnostic tool during the inspection process because each entry is time-stamped for easy recall.

WAGNER BI-2200 Moisture Meter

Instantly and accurately provides relative moisture readings and features a wide range of selectable building materials that includes stucco, plaster, drywall/sheetrock, ceramic tile, linoleum, shingles, roofing, roofing felt, varnish, wallpaper, tiles and more. This exciting "pin-free" hand held moisture meter uses state-of-the-art non-invasive electromagnetic wave technology to take relative moisture measurement readings. **BLS00101**

HYGIENA ATP Luminometer

The SystemSURE II ATP Bioluminescence Luminometer is the next generation of ATP luminometers. Using state-of-the-art photodiode technology and simple user-friendly design this revolutionary palm-sized instrument is an extremely sensitive, accurate and affordable hygiene monitoring system. The systemSURE II is used to quickly determine the hygienic status of a surface after preoperational cleaning or to monitor the effectiveness of a sanitation program. It can also be used to monitor water quality. Current users of the systemSURE II are food and beverage processing plants, packaging facilities, restaurants, supermarkets and other manufacturing industries where rapid assessment of the hygienic status of a surface is critical. **BLS00102**

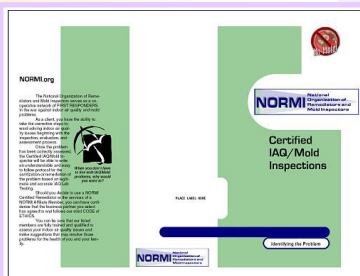

Certificate of SANITIZATION Brochures (50 Pack)
